

GREENLIGHT

ONLINE PERMIT MANAGER

Greenlight Online Permit Manager (OPM) manages the entire Local Government town planning and building processes through one fully web-enabled system.

Online access for Council employees, applicants, residents and referral authorities ensures that all stakeholders are able to lodge and share information efficiently and effectively.

With sophisticated workflow, automated correspondence and document management included, this multi-award winning system provides Councils with significant cost and resource savings in the processing of planning and building permits.

The Greenlight OPM Advantage

- Manages planning and building applications- Addresses a wide range of management and administrative requirements for multiple planning & building application types.
- Information shared between stakeholders - Increases operational efficiency by extending access to documents, data and business processes to internal and external users.
- Manages critical processes - Supports regulatory compliance by ensuring proper management of critical processes. The system's audit trail capabilities can track all interactions that occur throughout an applications lifecycle.

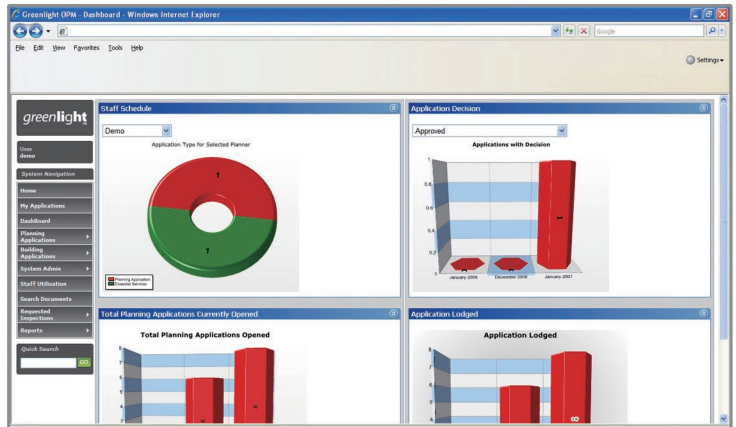

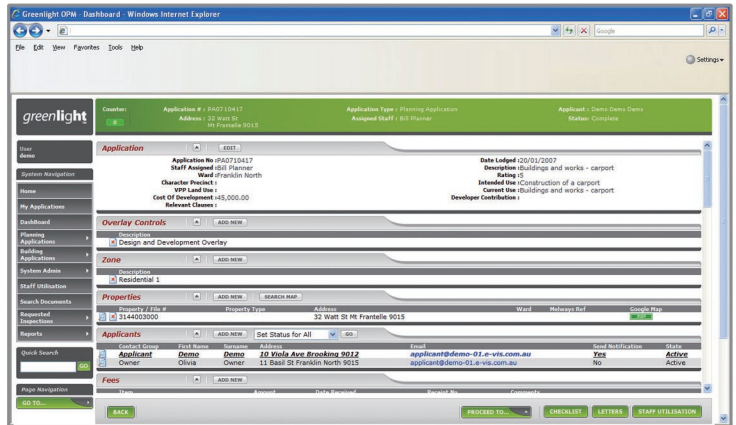

Planning and Building Completely Online

Greenlight Online Permit Manager is entirely web browser based, allowing the entire permit application process to be performed online.

Applicants can lodge and track planning and building applications via the internet, 24 hours a day, 7 days a week. The workflow component allows Council staff to securely process applications from anywhere that online access is available. Built-in document management means that the expensive paper trail associated with the processing of applications is eliminated as all correspondence is automated and electronic.

Interface With Referral Authorities

Greenlight OPM provides a fully customised referral interface through which all referral authorities can receive, attach and comment on documentation related to permit applications. This user-friendly module improves efficiency in information sharing and records keeping between Councils and referral authorities.

Key Features

Greenlight Online Permit Manager has been widely recognised for its innovation and service delivery capabilities. Some of its key features include.
